

Strategic Intelligence Briefs — Commercial Licensing Pack

This document defines the licensing, pricing, and compliance framework governing access to Strategic Intelligence Briefs. It establishes the tiers of use — from individual excerpts to sovereign integration — and sets out the pricing philosophy, royalty obligations, and enforcement clauses under United Kingdom Governing Law. The pack is designed for procurement, compliance, and legal teams to evaluate licensing options with clarity and foresight.

Strategic Intelligence Briefs — Commercial Licensing Pack

Author: Mitha Soeprapto-Fox

Use: Regulatory Intelligence, Sectoral Risk, Strategic Foresight

Jurisdiction: United Kingdom (Governing Law)

01. Licensing Tiers

- **Excerpt Access (Individual Use)** — £2,000 per Excerpt Grants access to a single excerpt or section of a brief. **Permitted:** personal reading and reference only. **Not Permitted:** redistribution, copying, uploading to systems, AI ingestion, or commercial/institutional use.
- **Summary Access (Individual Use)** — £12,500 per Summary Grants access to an executive-level digest of a full brief. **Permitted:** personal reading and analysis. **Not Permitted:** redistribution, sharing, uploading, AI ingestion, or commercial/institutional use.
- **Personal Access Licence (Individual Use Only)** — £35,000 per Brief Temporary, view-only access for one individual (CROs, executives, partners). 30–60 day access window via secure drive. **Prohibited:** redistribution, copying, sharing, AI ingestion, derivative works.
- **Personal Ownership Upgrade** — +£20,000 (Total £55,000) Converts temporary access into long-term personal ownership. **Permitted:** one personal digital copy, long-term reference. **Not Permitted:** redistribution, sharing, uploading, AI ingestion, derivative works.
- **Single-Entity Licence** — £175,000 per Brief Internal use within one legal entity. **Permitted:** internal reading, distribution, decision-support. **Not Permitted:** subsidiaries, affiliates, external distribution, AI ingestion.
- **Multi-Entity / Subsidiary Licence** — £175,000 + £75,000 per Additional Entity Extends rights across multiple regulated units.
- **Enterprise-Wide Licence** — from £550,000 per Brief Unlimited internal use across all entities under a parent company. **Permitted:** ingestion into internal knowledge bases (non-AI).
- **Annual Access Licence** — from £1,250,000 per Year Includes 4–6 briefs annually, horizon scans, sectoral updates, priority custom requests, and annex access.
- **Derivative-Use Licence** — from £800,000 Grants rights to adapt content into internal frameworks, decks, training, or governance playbooks.
- **Vendor / Platform Integration Licence** — from £5,000,000+ Base Mandatory for SaaS, enterprise AI, or platform developers embedding proprietary models (SES, C-SCIL). Includes revenue share and ingestion royalties.

- **Sovereign / Regulator Licence** — from £6,000,000+ For ministries, sovereign funds, regulators. Includes full suite access, unified annex, custom sovereign risk modelling, and multi-year alignment.

02. Terms of Use & Limited Licence

- **Scope:** Non-exclusive, non-transferable, revocable licence for internal use.
- **Permitted:** reading, internal analysis, decision-support, internal distribution (licensed entity only).
- **Prohibited:** redistribution, external publication, AI ingestion, derivative works, client-facing use.
- **Intellectual Property:** All briefs remain the exclusive property of the Author.
- **Attribution:** Required internally (“Source: Mitha Soeprapto-Fox, Strategic Intelligence Brief”).
- **AI Restrictions:** No training, ingestion, embedding, or dataset creation without separate licence.
- **Revocation:** Breach, redistribution, misuse, AI ingestion, misrepresentation, or non-payment triggers immediate revocation.

03. Pricing Logic

Pricing reflects regulatory foresight value, sectoral exposure mapping, decision-grade clarity, and risk-avoidance impact. A single brief may prevent multimillion-pound penalties, compliance failures, or procurement misalignment.

05. Pricing Philosophy

The pricing of Strategic Intelligence Briefs is not based on length or page count. It is calibrated to the **cost of regulatory misalignment** and the **value of foresight** provided. Each tier reflects:

- **Risk Avoidance Value** → A single brief may prevent multimillion-pound penalties, compliance failures, or procurement missteps.
- **Depth of Access** → Excerpt and Summary tiers provide limited reference points, while full briefs and institutional licences deliver comprehensive frameworks.
- **Scope of Use** → Pricing scales with distribution rights — from one individual, to a single entity, to enterprise-wide, sovereign, or platform integration.
- **Proprietary Frameworks** → SES matrices, C-SCIL models, and annexes are priced according to their strategic impact and exclusivity.

This philosophy ensures that pricing reflects **decision-grade clarity and institutional relevance**, not document length.

06. Licensing Framework Explanation

The Strategic Intelligence Briefs are priced and tiered to reflect **depth of access, scope of use, and regulatory risk value**. Each tier is designed to match a specific audience and purpose:

- **Excerpt Access** (£2,000) → For individuals needing a *single reference point*. This tier exists to filter casual interest from serious buyers while still monetising limited access.
- **Summary Access** (£12,500) → For executives who require *digestible foresight* without full technical immersion. It balances accessibility with protection of proprietary depth.
- **Personal Access Licence** (£35,000) → For CROs and senior decision-makers needing *full brief access* for short-term strategic decisions. Temporary, view-only, strictly personal.
- **Ownership Upgrade** (£55,000 total) → For individuals who want *long-term reference rights*. Still personal, non-transferable, but permanent.
- **Single-Entity Licence** (£175,000) → The baseline institutional tier. Grants internal distribution within one legal entity, aligning with compliance and audit needs.
- **Multi-Entity Licence** (£175,000 + £75,000 per subsidiary) → For regulated groups with multiple units. Ensures each entity is properly licensed.
- **Enterprise-Wide Licence** (£550,000+) → For multinationals requiring *group-wide access*. Allows ingestion into internal knowledge bases (non-AI).

- **Annual Access Licence** (£1,250,000+) → Subscription model for recurring foresight. Includes multiple briefs, horizon scans, and priority custom requests.
- **Derivative-Use Licence** (£800,000+) → Grants rights to adapt content into internal frameworks, decks, and governance playbooks.
- **Platform Integration Licence** (£5,000,000+) → Mandatory for SaaS and AI developers embedding proprietary models. Includes revenue share and ingestion royalties.
- **Sovereign / Regulator Licence** (£6,000,000+) → For ministries, sovereign funds, and regulators. Provides full suite access, unified annexes, and sovereign risk modelling.

07. Royalty & Integration Explanation

- **Revenue Share** → The 15% gross revenue share is not arbitrary; it reflects the **derivative commercialisation value** of embedding SES or C-SCIL frameworks into SaaS/AI products. It ensures the Author participates in downstream monetisation.
- **Recurrent Ingestion Royalty** → The £1.5M+ annual royalty is a **continuity safeguard**. It covers ongoing ingestion, model updates, and compliance monitoring. Without it, platforms could exploit the frameworks indefinitely without compensating the originator.
- **Corporate Anchor** → The £5M base anchor is a **barrier to entry**. It filters out unserious vendors and ensures only major SaaS/enterprise AI players engage.
- **Legal Escalation Clause** → Immediate escalation under UK law for unauthorised ingestion is critical. It positions misuse as **asset conversion damages**, not just IP infringement — raising the stakes for compliance.

08. Compliance Note

All royalty and integration terms are enforceable under **United Kingdom Governing Law**.

- **Asset Conversion Damages** → Unauthorised ingestion, embedding, or automated processing of proprietary frameworks (SES, C-SCIL) is treated as asset conversion, not mere IP infringement.
- **Immediate Escalation** → Breach triggers immediate, irrevocable escalation to legal enforcement without further negotiation.
- **Mandatory Deletion** → Upon revocation, all copies, datasets, and derivative modules must be deleted within 7 days.

- **Audit Rights** → The Author reserves the right to audit licensed entities for compliance with ingestion and royalty terms.

This clause ensures that **royalty obligations are binding, enforceable, and non-negotiable**, protecting against silent ingestion or unauthorised platform integration.
